LETTER OF RECOMMENDATION
for Bogdan Panov

To Whom It May Concern,

I would like to recommend Bogdan Panov, who worked under my supervision as a Unreal Engine programmer in Chronospace. Bogdan is not only deeply committed to his work but also demonstrates great passion and a constant drive for development in this field.

During our time working together, Bogdan displayed an ability to swiftly grasp new information and techniques related to Unreal Engine. His programming skills were valuable in the projects he was involved in. His determination in solving technical problems was commendable. Bogdan under my supervision participated in the implementation of mini-games according to game design. He was changing/extending existing systems nad creating new systems as well. In addition, he participated in the localization of the game into more than a dozen languages, for which, on his own initiative, he created a script to automate the activities.

Furthermore, Bogdan effectively leverages his experience from previous companies, translating it into tools for problem-solving in other technologies.

I am convinced that Bogdan will be an outstanding addition to any team working in the realm of Unreal Engine. His programming abilities and commitment to continuous improvement will undoubtedly make him a valuable asset to your organization.

Sincerely,
Marek Garczewski
